

THE GAME Anchors & Flares

Please note this is provided as a separate download.

Instructions Sheet

To play Anchors and Flares you need

- the Anchors and Flares board
- a dice and counters for all players
- the instruction sheet
- copies of the life jacket True/False cards and the boat opinion cards.

To start

Place the cards into two piles beside the life jacket and boat cards.

Each player throws the dice. The one with the highest number starts. If two players have the same high number, they must throw again until one person has the highest number to start.

The next person to play is the person on the right of the starting player. Play goes around the circle.

Playing

Each player starts on the 'start' square. They throw the dice and move the number of squares on the dice face.

- If a player lands on an anchor they go down. If they land on a flare they go up.
- If they land on a life jacket square they must answer a question from the life jacket True/False pile of cards.
- The group decides if the answer the player gives is correct. If the answer is correct the player moves forward two squares.
- When they have finished the player puts their card on the bottom of the pile of cards.
- If the player lands on any of the boat squares they must answer the question from the boat pile of cards.
- The group decides if the answer the player gives is correct. If the answer is correct the player moves forward three squares.
- When they have finished the player puts their card on the bottom of the pile of cards.

Finish

The first person to reach the finish square is the winner.

TRUE OR FALSE

You should check the marine forecast before you go boating.

TRUE OR FALSE

If you are under 12 you should wear a life jacket whenever you are in a boat.

TRUE OR FALSE
